

# DC-In Member Survey Results

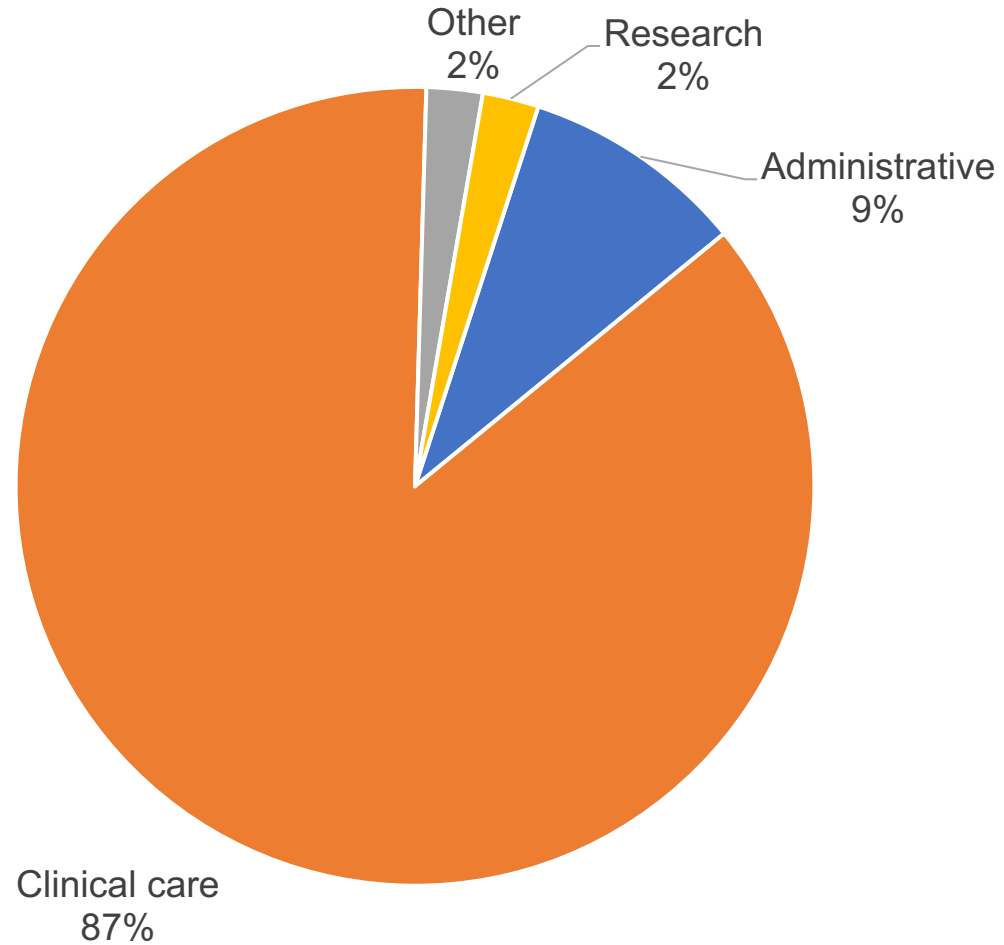

# Survey Distribution

- 143 surveys distributed
- 89 surveys completed (62%)

# Respondent Facility Type

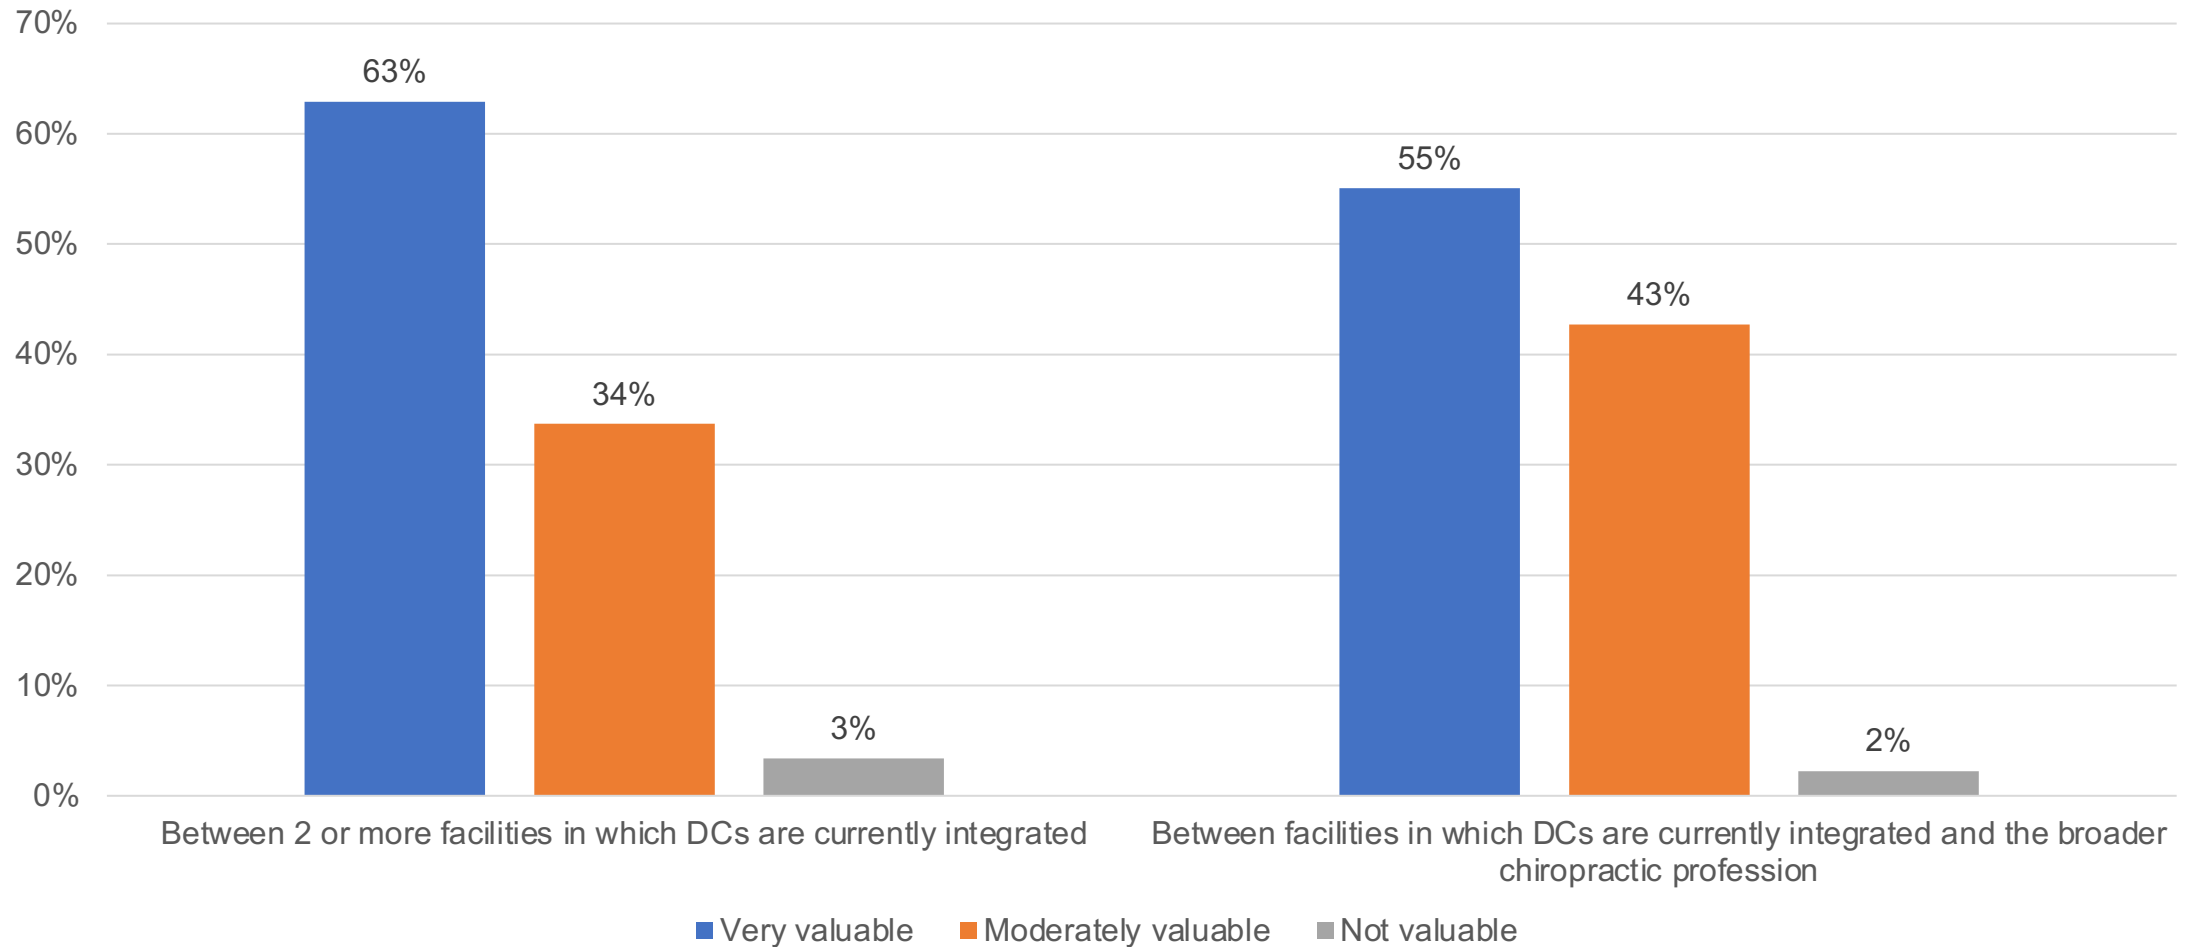

# Respondent Department Focus

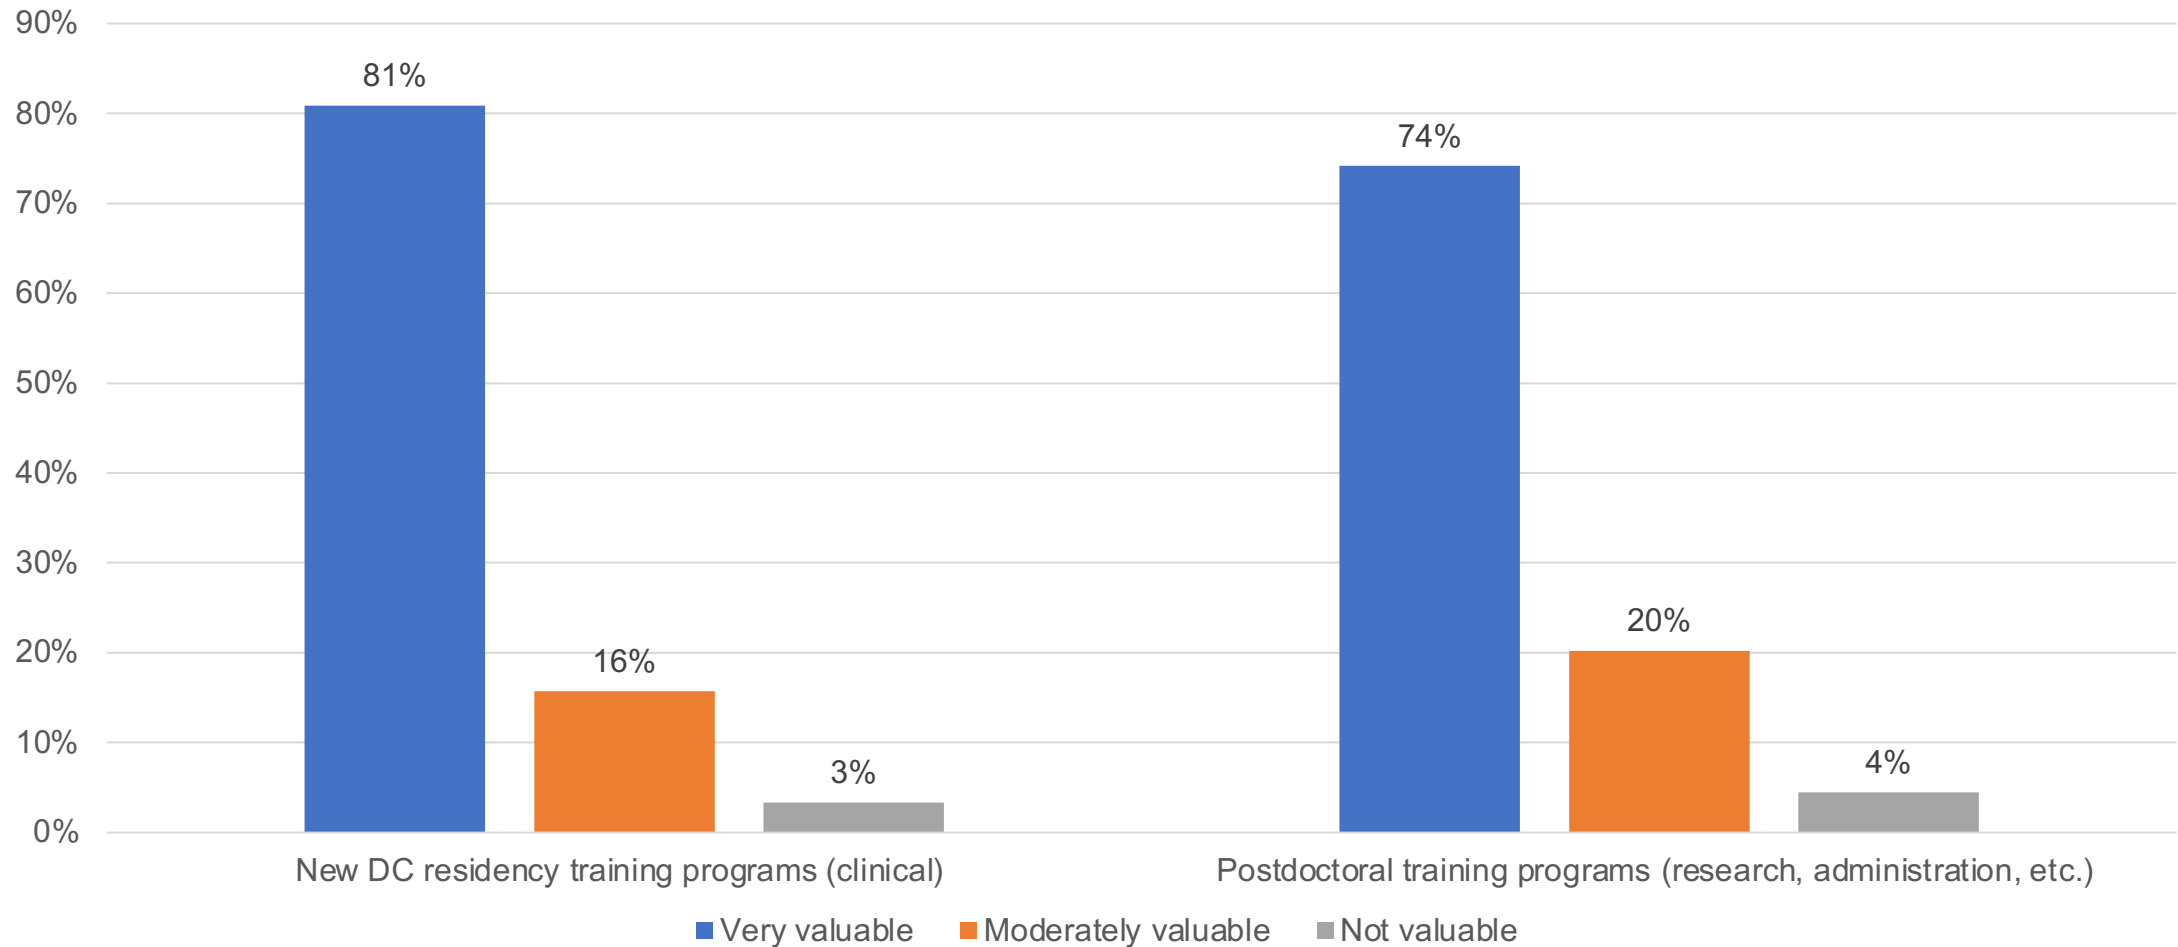

How valuable are the following potential projects and initiatives?

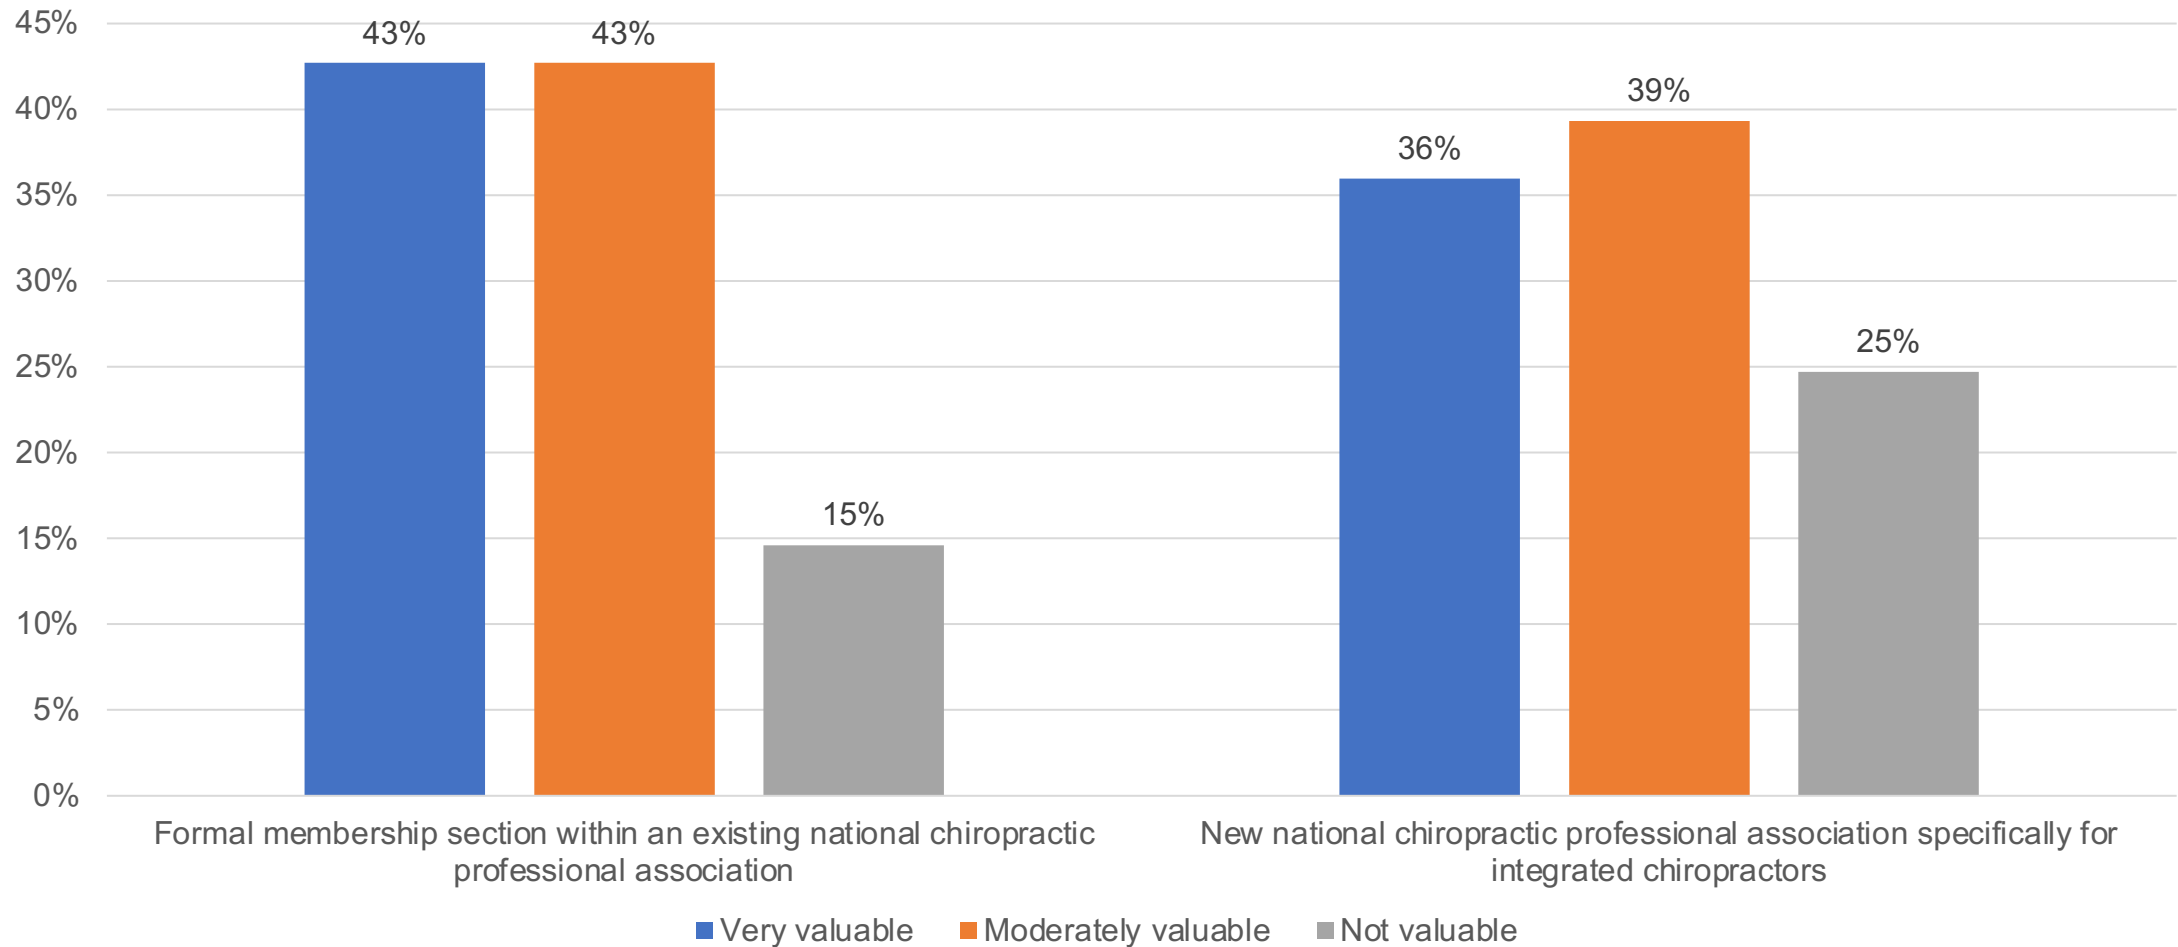

# Developing Research Collaborations

# Implementing Post-Doctoral Programs

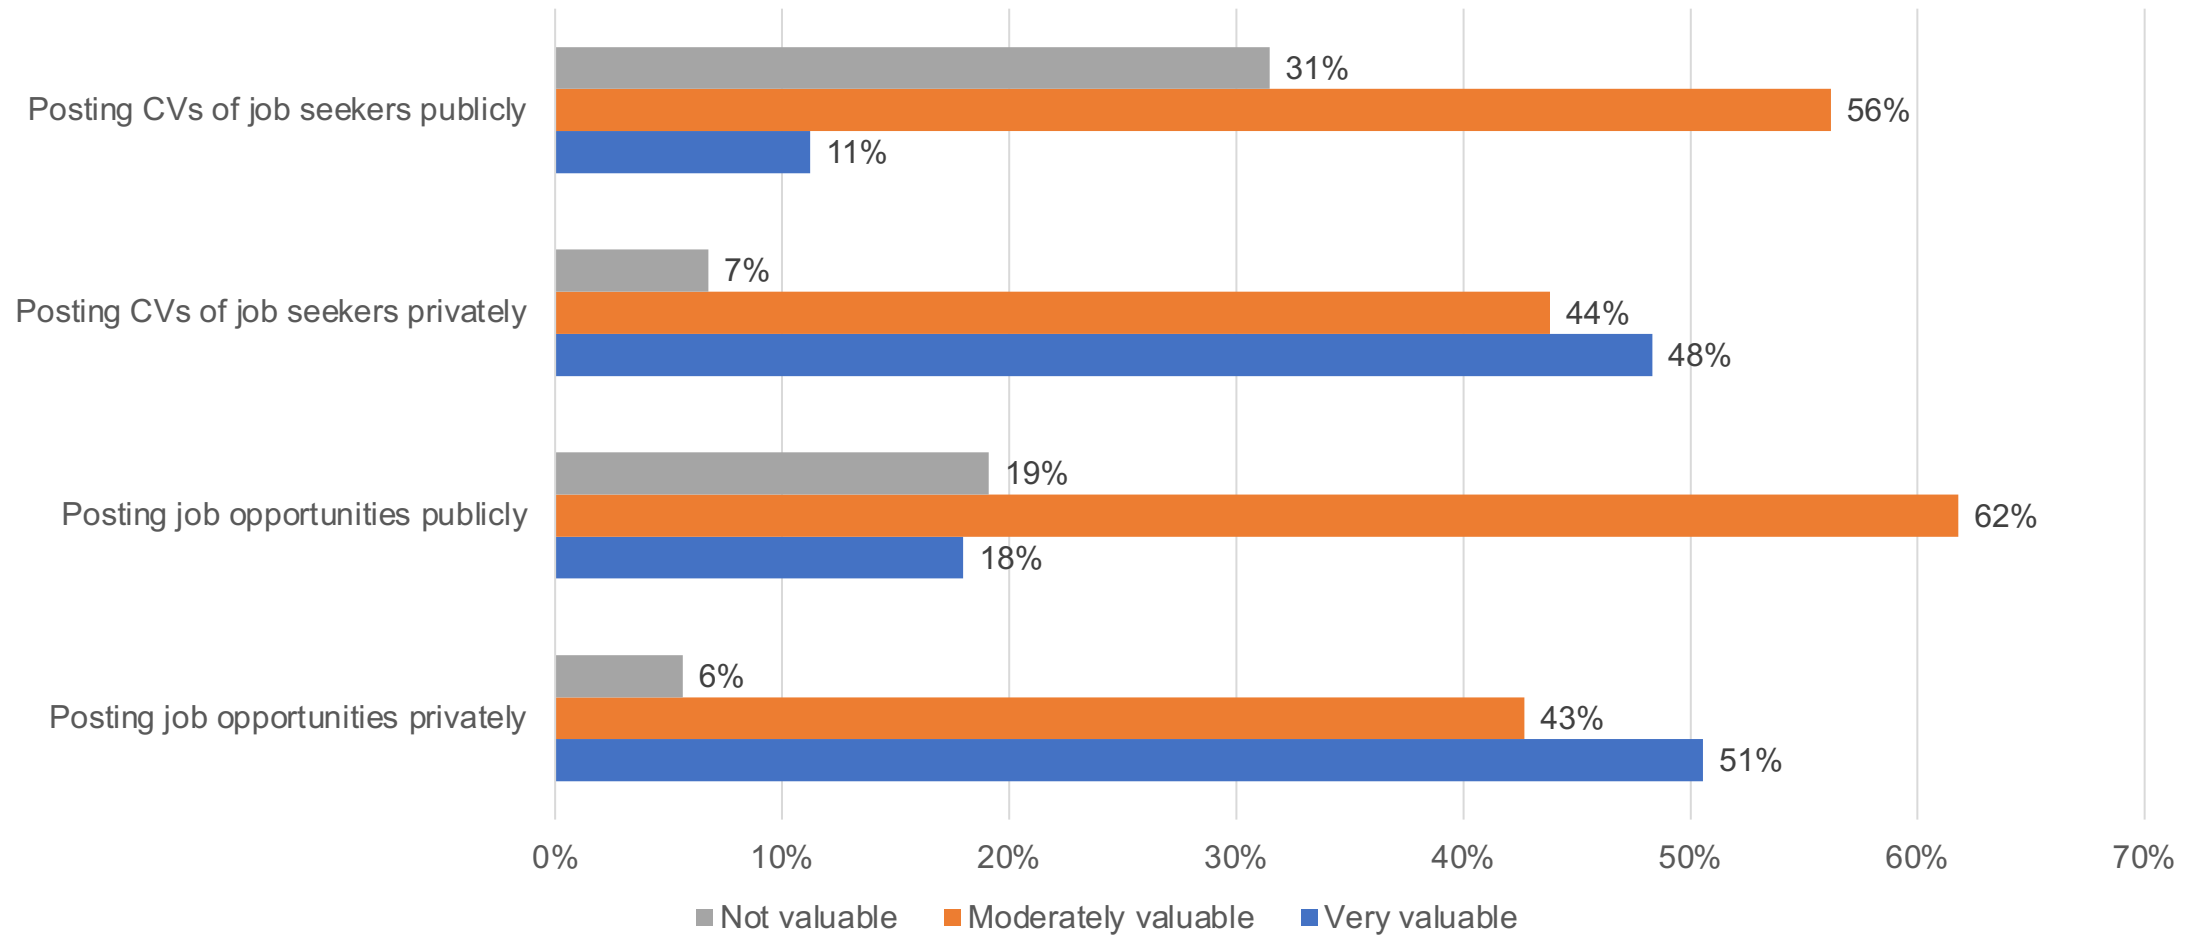

# Creating a Professional Association

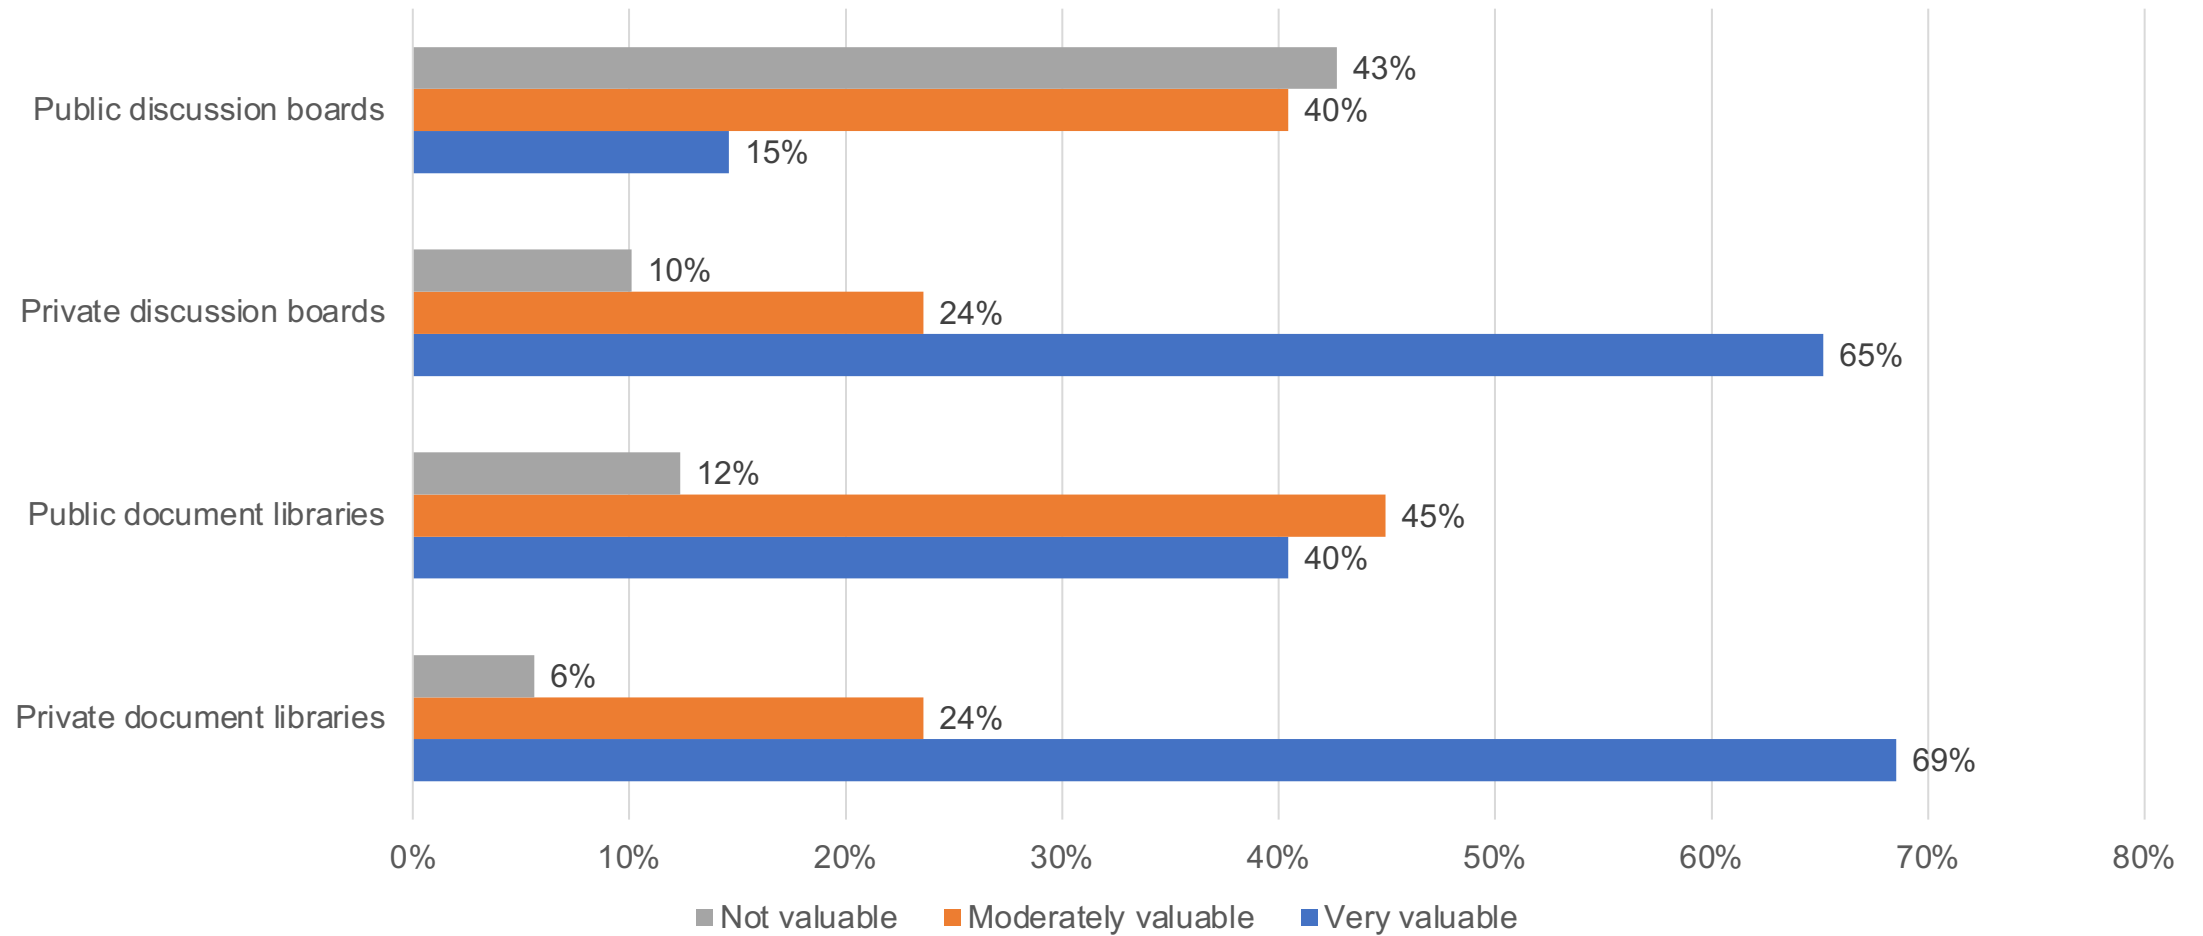

How valuable are the following potential additions to the DC-In website?

# Mechanisms For

# Mechanism For

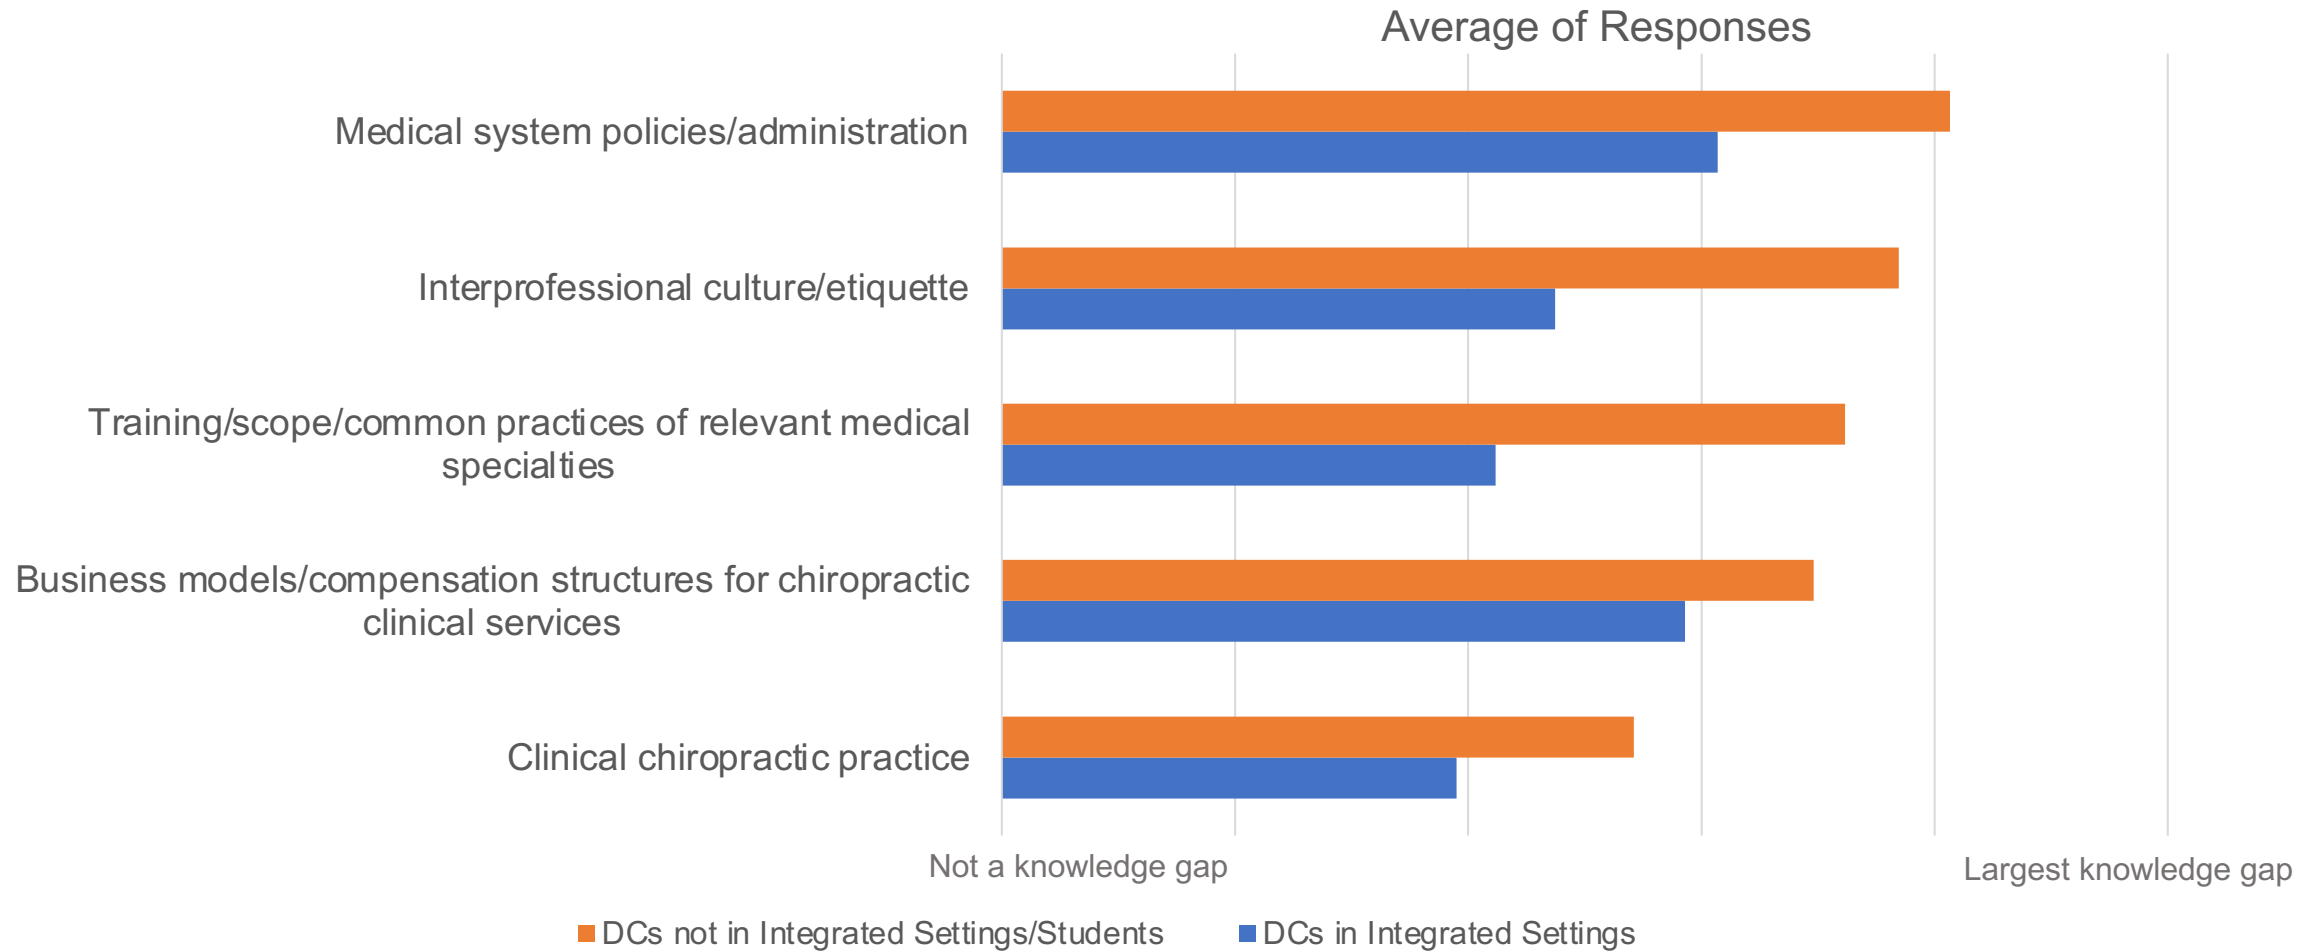

# Additional Suggestions for DC-In Website

- Continuing education catered towards integrated chiropractors (3)
- Integrated rotations for chiropractic students
- Best practices in how to initiate the process of medical staffing with or inclusion in mainstream healthcare systems

Among DCs currently working in integrated settings, what are knowledge gaps that should be overcome to foster further success?

# Knowledge Gaps

# Additional Knowledge Gaps

## Integrated DCs

- Ability to foster new formal relationships with new healthcare systems

## All DCs

- Evaluating and implementing best evidence (2)
- Discussion and operation in areas where conflict arises
- Ability to diagnosis musculoskeletal conditions without using subluxation as a diagnosis in EMR

## Non-Integrated DCs/Students

- Existing clinical practice guidelines
- Appropriate treatment frequency, duration, and plans
- Inter-professional communication
- Learning and understanding the economic drivers of the facility you are involved with, or are considering involvement
